DESIGN HIERARCHY IN FEED

- ✓ **Focal Point:** Every design must have one main element—a headline, product, or call to action.
 - ✓ **Rule of Thirds:** Position the most important elements at intersections of a 3x3 grid for dynamic composition.
 - ✓ **Typography as Story:** Limit fonts to 2-3. Use bold experimental typefaces to inform the mood.
 - ✓ **Contrast:** Text must be clearly visible against the background. Adjust brightness to pump up readability.
 - ✓ **Negative Space:** Don't cram everything into corners. Let the design "breathe."
